

# What Has Evolutionism Done for the Black Man?

*Paul Ellwanger*

## What's this about an 'inferior race'?

Some members of our black community take a dim view of the doctrine of evolution. One big reason is that evolution classes Blacks as related to the apes more closely than those of fairer complexion.

There's a rational alternative. It is Creation, the view of a number of scientists, that the Universe and everything in it, came into being in six days, and that man came about suddenly, with no help from the gorilla or any other animal – all by direction of the Intelligence Who planned it for a purpose. We need to stop wasting tax dollars searching outer space for extraterrestrial intelligence, for He revealed Himself to us long ago.

The philosophy of evolution would lead us in different paths. It decrees that man and his animal ancestors slowly developed by chance, over long periods of time, from microscopic germs that arose by magic out of sea-scum.

Charles Darwin, who popularized this idea through his book, *Origin of Species*, offered as its subtitle *The Preservation of Favored Races in the Struggle for Life*. Most folks don't know about this outrageous subtitle, but racial progression is the only thing that makes any sense – if you believe that evolution from germ to man actually occurred.

Darwin's "survival of the fittest" doctrine, when applied to man, styles races as successful because of in-born superiority. Kind of reminds a person of a man named Hitler.

## Evolution (taught in school) is based on Racism

What an outrageous fact of life in America! It should come as no surprise that Darwin depicts the Caucasian races as superior and said . . .

Looking to the world at no very distant date, what an endless number of the lower races will have been eliminated by the higher civilized races throughout the world.<sup>1</sup>

---

<sup>1</sup> Charles Darwin, *Life and Letters*, 1, letter to W. Graham, July 3, 1881, p.316.

E. A. Hooten<sup>2</sup> brazenly assaults us with a picture of four naked figures (hair removed) in this order – orangutan, chimpanzee, gorilla and Black man. How very racially disgusting. But for evolution to have occurred, it would had to have been that way. Indeed, just what has evolution done for and to the Black man?

### Huxley's Negro

Thomas Huxley, one of the most influential evolutionists in America, said . . .

No rational man, cognizant of the facts, believes that the average negro is the equal, still less the superior of the white man.<sup>3</sup>

He based this statement on the evolutionary concept of the white man's being "bigger-brained and smaller-jawed" and therefore better able to compete.

Samuel J. Holmes, in a discussion of the biological evolution of man, has this to say . . .

Pure blacks of proven natural ability of high order are in fact rare. The fact that mulattoes, despite their relatively inferior white parentage, are in all countries, superior to the blacks, is strongly indicative of a marked difference in the average intellectual capacity of the two races.<sup>4</sup>

Evolutionism has denigrated the Black man & should be exposed as the racist doctrine it is.

### No Racism, No Evolution

Modern evolutionists give the silent treatment to this truism, for well they know the ugliness and unacceptability of racism. But unless evolution is exposed for the myth it is, it is impossible for it to shed its teaching of racism. Consider the following . . .

Differences must exist both between and within races for evolution to occur, specifically differences that provide one race or group a survival advantage over the others. The race with traits that confer on it the greatest survival advantage presumably will in time become numerically dominant to those without this advantage.<sup>5</sup>

<sup>5</sup> Jerry Bergman, *Evolution and the Origins of the Biological Race Theory*, "Creation Ex Nihilo Technical Journal", vol.7(2), 1993, pp.155-168.

Evolution philosophy, disguised as science and dishonestly taught as fact in America's K-12 public schools, inherently and covertly promotes the outrage of racism.

Friedrich Nietzsche and his disciple, Adolph Hitler, were staunch evolutionists. Hitler applied this false philosophy by a human extermination campaign whose victims were those he believed evolution showed are inferior; namely, Jews and Blacks. A leading evolutionary anthropologist<sup>6</sup> made this observation: "The German Führer . . . has consciously sought to make the practice of Germany conform to the theory of evolution."

### **Racist Evolution's Other Problems**

Today the evolution myth is in trouble with scientific evidences as the fossil record, new discoveries about heredity and mutations, and the immutable laws of thermodynamics. More importantly, evolution is in trouble with Holy Scripture which, in its first seven chapters, contradicts evolutionary doctrine sixty-five times.

### **The Alternative**

It takes an enormous act of faith to believe in an accidental hydrogen-to-man evolution (with its evil fruit of racism) and that the wondrously ordered Universe came from eternal matter and is also here by chaotic accident. There is only one alternative: the Biblical account of Creation by an infinite Creator Who created when and in the way He told us in Holy Scripture.

### **Summary**

The Black man has been done a grave injustice by evolution, an injustice that is being perpetuated within the global academic community. It should become obvious, even to a casual observer, that although evolution was early on recognized as irrational, the only alternative is unthinkable for atheists.. Which is to say, evolution is not only a racist fairytale, but it is an assault on the Creator and His Holy Word. The Atheism [atheistic evolution] is now the official religion in the public schools of the USA. How utterly shameful.
